

Amendments to the Specification:

The Examiner objects to the specification because of the following informality:

Page 4, Line 11, add "of walls" after -a pair-.

*The applicants have made the correction to the specification as suggested by the Examiner. Please replace the paragraph with the following amended paragraph:*

Methods of making a circuit board holder 10, according to embodiments of the invention for installation in an aperture 12 of a power panel 13, provide that circuit board holder with a face plate 14 larger than that aperture and with walls 16, 17, 18 and 19 projecting from an inside 20 of that face plate. Those embodiments of the invention equip a pair of walls 16 and 18 of opposite ones of the walls 16, 17, 18 and 19 with circuit board retainers 21 and 22 and/or 33 and 34. Those embodiments of the invention further equip the circuit board holder 10 with a holder retainer 23 for releasably retaining that circuit board holder in the mentioned aperture 12 of the panel 13.
